The Aerofoam insulation is being delivered in 2013, for the ducting applications. All the manufacturer recommended installing procedures were followed during the works.

The project is in the northern city of Al Khor; it aims to rent attractive, medium to high quality residential apartments for the city's residents. The project involves the construction of ten 3-bedroom apartment buildings, an electric substation, a fire water tank and pump room, five underground water tanks, and all associated external works.
