

BANADAR HOTEL – Bahrain

AEROFOAM® XLPE

Main contractor:
GPZ

Location:
Bahrain

Consultant:
MSCEB

MEP Contractor:
Rumaitha

The Aerofoam insulation is being delivered in 2011 and has been used for the plumbing applications. The required quantities were 5,000 m of tubes AEROFOAM XLPE.

The design was commissioned by Banader in association with Rotana. The brief requested 267 hotel rooms, including executive rooms, larger suites and 140 serviced apartments of one, two and three bedroom units. The development also includes a dramatic rooftop pool and fitness centre. The height of the tower will enable it to be clearly visible from the Bahrain International Airport and the King Faisal King Faisal Highway, achieving the impressive skyline requested by the client.
