MEP Contractor:

1. Saudi Bin Laden Group
2. Bin Laden Dubai
3. Sterling Wilson
4. Unistar Electromechanical Contr.

The Aerofoam NBR insulation has been delivered between 2011 and 2012 and was used in plot P-10, phase 11 of the project. The required quantities were 205,000 m of tubes. For this work all the requested accessories and installing techniques were used according to the manufacturer's indications.

The project involves construction of a financial district which will be centered on the high rise headquarters of the financial sector regulator, the Capital Market Authority (CMA), Saudi Arabian Monetary Agency (SAMA) and the Saudi stock exchange (Tadawul). A government funded financial academy will be set up within the district to train new entrants into the sector. The 3 million square meters of office space will be offered to local and foreign banks, insurance companies and other financial institutions. The development features more than 40 towers with each tower having 4 basement levels for parking. Utilities and services will include a data centre, a 100,000 ton district cooling network and a monorail. When completed, KAFD will also be the location for the headquarters of the Commodity Market and other service providers.
