Business Bay, Dubai

Consultant:

Development Consult, Architects,
Engineers & Planners

MEP Contractor:

Aikah

The Aerofoam insulation has been delivered in 2012 and has been used for the HVAC applications. The required quantities were 1,000 square m of sheets of AEROFOAM XLPE. All the manufacturer recommended installing procedures were followed during the works.

The project involves construction of a commercial tower comprising 3 basement levels, a ground floor, 3 parking floors, a health club and 18 additional floors. The tower offers state-of-the-art office spaces, retail and recreational facilities, beautiful landscape, an exclusive world of boutique retail space on the ground floor, swipe access, high speed internet, a business lounge, a reception desk, 24 hour security and security cameras.
